Natural Intelligence
LEARNING FROM NATURE'S TIME-TESTED STRATEGIES

NI#1: **Bio-diverse**

➔ How can packaging source its resources in a biodiversity friendly way?

NI#2: **Bio-logical**

➔ How can packaging and its production processes build on nature's intelligence (for instance, less material – more design)?

NI#3: **Bio-inspired**

➔ Which examples from nature are interesting to learn from when it comes to packaging important content?

NI#4: **Bio-chemical**

➔ How can packaging and its production processes become life-friendly (non-toxic)?

NI#5: **Bio-fabricated**

➔ How can packaging and its production processes contribute to economies of place?

NI#6: **Bio-sphere**

➔ What is needed to shift packaging from degenerative towards regenerative impact?
