

Réseau Consigne is the national network for packaging reuse professionals

MISSION

The objective of the NGO is to **promote and support the development of packaging reuse systems** in France in order to **prevent and reduce waste and resource consumption**. Réseau Consigne fulfils this objective by:

- ➔ Hosting a network of actors of the packaging reuse ecosystem
- ➔ Encouraging new connections and finding opportunities for the pooling of resources between actors
- ➔ Helping and advising new project holders
- ➔ Promoting packaging reuse systems and highlighting solutions
- ➔ Pushing for regulatory changes and carrying the voices of reuse professionals in the public debate

2000

The network members include food producers, distributors, reuse chain operators, city councils, packaging manufacturers, and more.

They all drive change in various industries to offer alternatives to single-use packaging

The turnkey solution that enables professionals to switch from disposable packaging to reusable packaging

Today, **transport packaging is a burden for retailers, shops, restaurants and their suppliers**

Transport packaging are cardboard boxes, wooden crates and polystyrene foam boxes that are thrown daily.

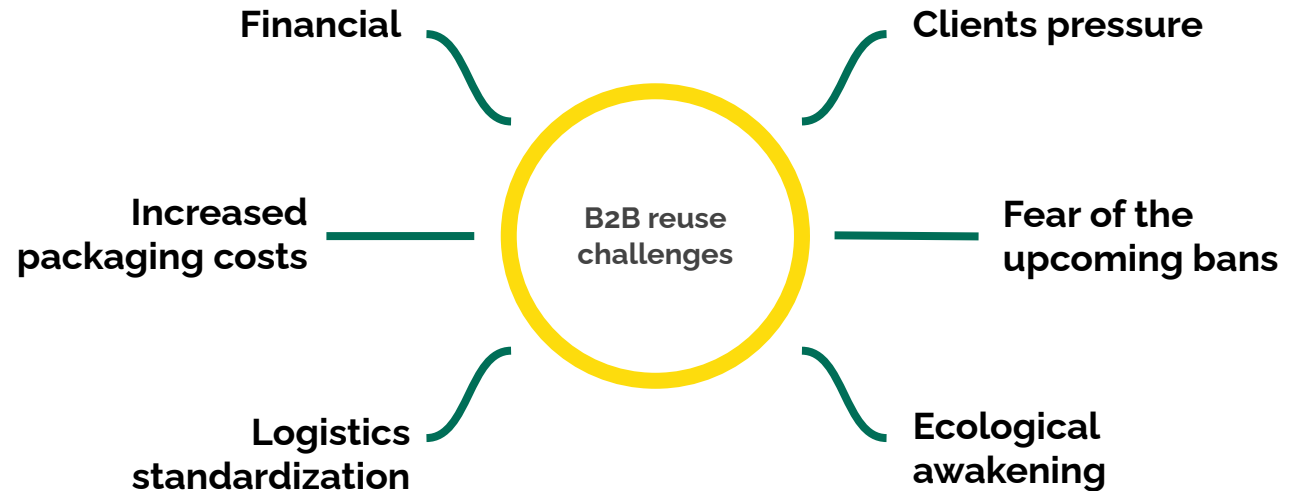

Very few regulations in France aim B2B packaging, the challenges are different than in B2C

AGEC law : reuse goals for 2027

Polystyrene foam forbidden in few cities

Pandobac provides an **all-in-one reusable packaging** solution for B2B

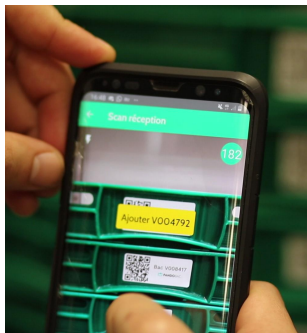

Reusable packaging service

Consulting

1

Full service with crates supply and their tracking
Optional : collection, washing

2

Only the tracking service
Optional : sale, collection, washing

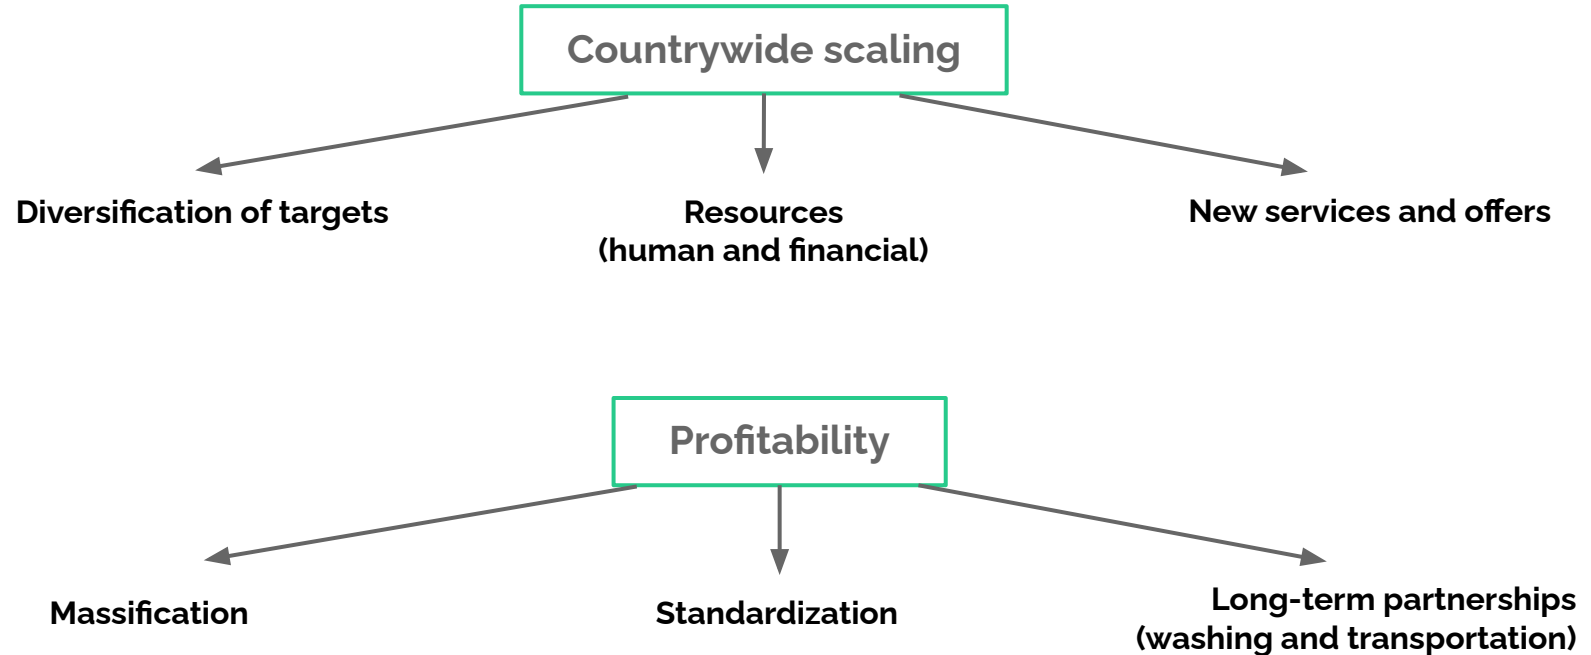

3

Consulting
in reusable packaging systems (B2C or B2B)

Next steps and big challenges for Pandobac

Thank you !
